### **New app and website make riding the bus even more convenient**

Capital Transit has launched a new app and website that make using and navigating Juneau's public transportation system easier.

"The goal is to make Capital Transit more user-friendly and simpler to understand. Some people say it's difficult to navigate the system. We hope the new app and website improve the customer experience for current and new users," Transit Superintendent Ed Foster said.

[Transit](#), the official app of Capital Transit, allows you to see where your bus is on a map in real time. You can view schedules, route itineraries and receive departure alarms, service disruption alerts and departure reminders. A GO feature gives you step-by-step directions when you're on an unfamiliar route.

New bus stop signs recently installed around Juneau feature round color-coded numbers that tell you which routes serve each stop, as well as a larger, unique stop number. You can enter the unique stop number into the Transit app, [juneaucapitaltransit.org](http://juneaucapitaltransit.org) or text it to 1-888-497-4896 to receive real-time arrival estimates to your location.

"The bus has long been a convenient, cost-saving alternative to driving a vehicle and we hope these new additions will draw new users to Capital Transit," Foster said. "Incorporating this technology into Capital Transit furthers our mission of providing safe, reliable transportation and providing the best possible transit service to the community."
