INFORMATION RELEASE  
May 23, 2017

**Glacier Highway sewer main replacement starts this week**  
*Public should anticipate traffic disruptions in Lemon Creek area*

Starting later this week, contractors for the City and Borough of Juneau will be replacing the sewer force main along Glacier Highway between Anka Street and the Lemon Creek Bridge. Underground utility work will impact traffic and cause construction noise.

The project is scheduled to take approximately six weeks. Arete Construction will be working 7 a.m. to 5 p.m. Monday through Friday, and 10 a.m. to 5 p.m. on Saturday. Some night work from 7 p.m. to 6 a.m. will be required. DOWL Engineering is the onsite construction inspector for the project.

During this time frame, the public can anticipate some traffic revisions on Glacier Highway, Anka Street, Tongsgard Court and Concrete Way, so please drive cautiously.

For more information, contact CBJ Project Manager Paul Beck at 586-0882, Arete Construction's Jason Sims at 780-6866, or DOWL Engineering's John Scott at 780-3533 or Justin Kanouse at 780-3533.
